FIRST ASST. SECRETARY TO GOVERNMENT
27 FEB 1952
DEVELOPMENT DEPARTMENT

Sub: Education - Fisheries School - Tangapathi - South Kanara District - Construction of a Pucca building - Sanction - Requested.

****

The Fisheries Elementary School at Tangapathi in South Kanara District was started by this Department in the year 1926. It is a permament School having a Staff of one Secondary and 4 higher Elementary Grade teachers with a total strength of 162 pupils. At present the School is being run in two Kutcha sheds owned by this Department. The old shed was constructed in 1931 with stone pillars, bamboo thatties and cocanut stem pillars and beams and the new one in 1944 with cocanut stem pillars and walls made up of Cadjan thatties. Both the sheds have become quite unfit and unsafe for being used any longer on the sandy beach facing strong wind and rain. An amount not exceeding Rs.400/- is being spent annually towards the monsoon repairs to both these sheds. Even after spending such a large amount towards monsoon repairs, the sheds are not found safe and suitable for continuing the School.

The inspecting officers are very often remarking that a pucca building should be provided for housing the School. Several attempts were made to find out private agencies to provide a suitable building for the school but in vain. Therefore it is highly necessary to construct a pucca building for housing the above said School. An estimate for Rs. Rs.15,500/- prepared by the Fishery Engineering Supervisor with 150 School places is enclosed herewith for perusal and return. No provision has been made for this item of expenditure in the Budget Estimate for the current year or in the year 52-53. I therefore request that sanction of the Government may kindly accorded to incur this expenditure and the work of construction may be entrusted to the Public Works Department, for execution during year 1952-53 itself. The existing temporary shed can be sold in auction after proposed new pucca building is completed.

DEVELOPMENT DEPARTMENT

Buildings - Fisheries School, Tarapathy, South Kanara District - Construction of a new building - Regarding.

Ref: Government Endorsement No. 21452-F/52-2, dated 12-3-52.

*** Plans

I return herewith the plans and estimate for the above work received with Government Memorandum cited with the following remarks:-

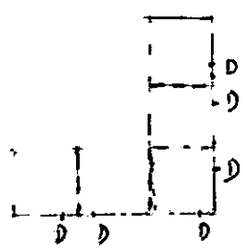
1.1) The estimate for Rs.15,500/- prepared by the Fisheries Department provides for constructing a school building with 5 class rooms 20' x 20' each at the site of the old and dilapidated sheds at Tarapathi, South Kanara District, wherein the School is now located. The new building proposed will be of plain Mangalore tiled roof on country wood rafters supported by country wood king post trusses at intervals. The trusses will be suported by laterite masonry pillars at ends, and the panels between the pillars will be closed with a dwarf wall 3'-0" high and with bamboo mat thatties above. The doors and windows proposed will also be of double bamboo mat thatties.

1.2) The foundations for the pillars proposed by the Fisheries Department seem rather excessive. The necessity for the foundations proposed should be examined during execution, and the section reduced suitably, if possible.

1.3) No damp proof course has been proposed. A damp-proof course with cement mortar 1:3, 1/2" thick should be provided for all walls in basement, just below the underside of flooring concrete.

1.4) A king rod truss may be used for supporting the roof, instead of a king post truss proposed by the Fisheries Department, as the former is easier to execute, and also presents a better appearance.

1.5) As per the plan prepared by the Fisheries Department the entrance to the corner class room will be through the class rooms adjoining the corner rooms. With a view to provide a separate entrance to each class room, it is suggested that doors may be provided in the outer walls as marked in the sketch in the margin, instead of providing them in the inner walls as proposed by the Fisheries Department. The orientation of the building may also be revised as indicated in blue on the site plan prepared by the Fisheries Department, to suit the revised location of doors now suggested.



p.t.o.

1.6) The Director of Fisheries has observed in his letter No. 3005-C.3/52, dated 24-2-1952 to Government, that the existing temporary sheds may be sold in auction after the proposed new building is completed. This suggestion is not practicable, as the new building is proposed at the site of the existing sheds-vide site plan prepared by the Fisheries Department. Either the new building should be located away from the existing sheds, or the sheds should be pulled down first, before the new construction is taken up. In order that the school may run without interruption, it is suggested that the new building may be located on the vacant space north of the rain gauge if the Fisheries Department is agreeable to the change over.

1.7) Minor mistakes in data have been corrected and the estimate cost of the work at current schedule of rates comes to Rs.16,200/- against Rs.15,500/- worked out by the Fisheries Department.

2) There is no objection for the work being taken up by the Public Works Department. The expenditure on the work may be debited to "50. Civil Works - Original Works - Industries - Fisheries - Major Works." Necessary additional funds required will be applied for, in due course after the orders of Government are received in the matter.

Sir,

Sub: Education - Fisheries school, Tarapathy, South Kanara District - construction of a new building- remarks - submitted.

Ref: Development Department endt. No.21452-F/52-6 dated 22-7-1952.

- - - - -

I submit hereunder my remarks called for in the reference cited.

Para 2: The foundation of the building has to be taken up 9'-0 below the existing ground level, because the site of the building is covered by made up earth as already explained in the estimate. The difference between the original ground level and made up earth is reported to be about 8'-0.

Para 3: A damp proof course may be provided.

Para 4: A king road truss may be used instead of a king post truss.

Para 5: The suggestions given by the chief engineer may be agreed to.

Para 6: The building may be constructed in the vacant space North of the rain guage as suggested by the chief Engineer.

Para 7: Sanction may kindly be accorded for Rs.16200/- instead of Rs.15500/- applied originally.

Para 8: The work may be given to the Public Works Department for execution by debiting the amount to "50 civil works"

The estimate received with the Government endorsement above is resubmitted.

Subj: Edn – Fisheries School at Tarapathy, S. Kanara dt – Construction of building

From the D.F, No. 3005-C3/52 dt 12.9.52.

The D.F. is informed that the Govt. have decided for the present not to sanction the proposal for the construction of a pucca building for the Fisheries School at Tarapathy, S. Kanara dt. But, while formulating the final budget for the current year, they may consider such of the deferred schemes as are imperatively and immediately essential in about July this year, for inclusion in the revised budget. The DF

is requested to state whether the above scheme may be ~~treated~~ considered as a part II Scheme for 1954-55. Or whether it is so urgent as to be included in the final budget for the current year w.r.t. the criteria mentioned above. In the latter case, the D.F. is requested to fully justify the urgency of the Scheme.

DP1 S-16 chan

--

1) I submit that the Fisheries School at Tarapathi is housed in two temporary thatched sheds, one constructed in the year 1931- with stone pillars, bamboo thatties and coconut stems and the other one was constructed in 1944. The second shed is purely a temporary Kutcha shed with coconut stem pillars and cudjan thatties.

2) Both these temporary sheds are in the open sandy beach close to the sea and they are not able to withstand the strong wind especially during the time of South West Monsoon. This is the main reason for suggesting a pucca building for the school especially when the existing sheds are not found to be safe to conduct classes for long . Besides this, the department is annually spending about Rs. 500/- for monsoon repairs. Therefore it is suggested that all this can be avoided if a pucca building is constructed. Therefore I request the Government to kindly take the above scheme for inclusion in the final budget for this year itself and sanction may kindly be accorded for the construction of the building. If however there is great financial stringency this year, the proposal can be put.off for one more year, the same being treated as part II for 1954-55.

The proposal relates to the construction of a Fisheries Elementary School at Tarapathi in S.Kanara Dist. at an estimated cost of Rs.16,200/- Bangalore. It is stated in support of the proposal that the school is now located in two kutcha sheds one of which was constructed in 1931 and the other in 1944 and that both of them have become quite unfit and unsafe for being used any longer on the sandy beach facing strong wind and rain. The Director of Fisheries has also stated that even after incurring an annual expenditure of Rs.400/- on repairs to the sheds, the sheds are not found safe and suitable for continuing the school. It is also reported that Inspecting Officers are often remarking that a pucca building should be provided for the school and that attempts were made in vain to find out private agencies to provide a suitable building for the school. Development support the proposal. While agreeing to the proposal, P.W. have suggested that as the work is a major one, the proposal may be considered as a Part II Scheme for 1953-54.

In view of the prevailing financial stringency, the work proposed, for which there is no provision in the current year's budget, cannot be sanctioned for execution during the curren year. Having regard, however, to the reasons given by the Director of Fisheries, Finance need not object to the proposal going forward as a Part II Scheme for 1953-54 as suggested by P.W.

Dev.(E) Dept.

The file deals with the proposal of the D.F. for the construction of a new building for the Fisheries Elementary School at Tarapathi in S.Kanara District.

The Fisheries Elementary School. Tarapathi is a permanent one, having a strength of 162 pupils at present. The School is being conducted in two Kutcha sheds constructed by the Dept., one in the year 1931 and the other in the year 1944. The D.F. has stated that both these sheds have become quite unfit and unsafe for being used any longer on the sandy beach facing strong wind and rain. Eventhough an annual expenditure of about Rs.400 was made towards their repair. He has stated that inspecting officers are often remarking that a Pucca Building should be provided for the School and that attempts were made in vain to find out private agencies to provide a suitable building for the school. The D.F. has therefore requested that it is highly essential to construct a pucca

building for the School during 1952-53 at an estimated cost of Rs.15,500 and the work of construction may be entrusted to the P.W.D.

The C.E. (Buildings) has scrutinised the plans and estimates and he has estimated the cost of the work at current Schedule of rates to be Rs.16,200, as against Rs.15,500 worked out by the D.F. The C.E. has stated that the construction work may be entrusted to the P.W.D. and the expediture debited to "50-Civil Works - orngnal works - Industries - Fisheries - Major Works" - This Department have supported the proposal of the C.E. (Buildings). while agreeing with the proposal, the P.W.Deptt, have suggested that as the work is a major one, the proposal may be considered as a Part II Scheme for 1953-54. Fin. Dept. have agreed with the P.W.Dept.

The case may now be circulated to M (Agri) M (P.W) and M (Fin) for orders whether the proposal of the D.F. for the construction of a new building for the Fisheries Elementary School, Tarapathi, South Kanara District at an estimated cost of Rs.16,200 will be accepted and treated as a Part II Scheme for 1953-54.

may be accepted

The proposal in this file is for the Construction of a pucca terracing for the Tanapathy fishery School (S. Kanara dt), at a cost of Rs 16,200/-. This was treated as a Part II Scheme

for the current year. The S.F.C. and the Cabinet have decided to defer this Scheme. No provision therefore exists for this scheme in the interim budget since passed by the legislatures. In their U.O. note at (2) Fin have advised that such of the deferred schemes as are considered imperatively and immediately essential for the proper running of the administration, may be brought forward again in July 1953 for consideration in connection with the preparation of the final budget for the current year. The S.F. may perhaps be asked to state whether the scheme may be taken up as a Part II scheme for the year 1954-55 or whether it is to ~~execution~~ urgent as it should be considered while formulating our final budget. Subject to orders, a draft memo is submitted for approval.

Read as 1st part of Memo 12-9266 F 153-6. dt 16.4.53 — PP 15-16 C

from the DF Ltr no 3005 C3/52. dt 9.6.53. — P 17 C

To AS

Please see the letter from the Director of Fisheries on P.17C in reply to first memo on PP 15-16C.

The DF has stated that the Fisheries School at Tarapathy is at present housed in two temporary thatched sheds one constructed in the year 1931, with stone pillars, bamboo walties and coconut stems and other was constructed in 1944 a temporary Kuticha shed with coconut stem pillars and Cadjan walties. He has stated that both these temporary sheds are in the open sandy beach close to the sea and they are not able to withstand the strong wind especially during the time of S.W. monsoon, and that is the main reason for

suggesting a Pucca building for the School especially when the existing sheds are not found to be safe to conduct classes for long. In addition to this, the DF has also stated, that the Dept. is annually spending about Rs 500/ for monsoon repairs of the School. In the circumstances the DF has requested that the scheme may be included in the final budget for this year itself and sanction accorded for the construction of the building. If however there is great financial stringency this year, the DF has suggested, the proposal can be put off for one more year, the same being treated as a Part II Scheme for 1954-1955.

Finance Dept may see for remarks.
